CG3000 HANDLE HIGHLIGHT

The CG3000 Professional Grade knife handle is the number one choice among restaurants. The rounded handle comfortably fits most hand sizes, and the ergonomic design and soft rubber material reduce wrist strain. Users experience maximum comfort for their entire shift.

Additionally, the CG3000 handle has the added benefits of increased hygiene and longevity. The double injection mold prevents cracks in the handle that tend to harbor dangerous bacteria. And, the tang won't loosen within the handle making the knife more stable.
