

# Protect & Organize your equipment

## SMS-200 steamer management system

Save valuable counterspace when using two steamers with the Steamer Management System. For use with the line of Miracle Steamers, this system allows units to be stacked while still providing easy access to the steaming compartment. It also organizes utility lines, water pressure regulators, and utility lines in one spot.

- Protects water pressure gauges from breaking
- Protects water strainers from breaking
- Provides a central water collection system with a single drain hose
- Organizes all utility lines in one area
- Saves valuable countertop space by stacking steamers
- Allows easy cleaning by providing ample clearance between steamers
- Includes dual water pressure regulator to control water pressure
