DESCRIPTION

Service Temperature Food Preserving is a patented technology that has been designed to preserve food at the temperature at which it is served and eaten. It means that you can cook food, keep it hot without blast freezing and regenerating it, and serve it in a few seconds at any time of the day and with zero waiting time for your customers. With only 600 mm deep, the EVEREO® 600 is the compact solution for quick installations in small spaces and outside the kitchen area. The EVEREO® 600 easily fits any business and is available with left or right door opening. The wide glass and the LED light allow maximum visibility of the products while the compact size allows you to quickly identify the products to be served without taking out the trays.
