

Fri-Jado SmartConnect

Your connected rotisserie

Efficient operations, lower service costs, increased uptime: enjoy the benefits of Fri-Jado SmartConnect. Get remote access to your fleet of rotisseries with one mouse click with this smart, IoT-based platform. The secured Wi-Fi connection saves costs compared to hard-wired connectivity solutions.

Fri-Jado SmartConnect is available for TDR 5 s auto-clean, TDR 8 s auto-clean and TDR 8 s + 8 s auto-clean.

Efficient operations

The latest recipes on all your rotisseries: simply upload new recipes to all connected machines. Moreover, the latest manuals are always available for consultation.

Lower service costs, increased uptime

Increase first-time-right fixes, eliminate downtime: your service partner can perform online diagnosis and can access the latest service documentation. Software updates are carried out automatically.

Data analysis

Analyze data such as running hours, error messages, etc. from your Rotisserie Dashboard to compare rotisseries between stores, optimize operations and initiate predictive maintenance.

Always secure

Our Cloud-based platform meets the highest security standards and utilizes the MQTT protocol. Connection is established using a secured Wi-Fi connection. The latest TLS/SLL encryption is used for data transfer. Different access levels (Retailer, Service partner) ensure that access can be managed.

Fri-Jado SmartConnect – Rotisserie Dashboard

Access your personal Rotisserie Dashboard to monitor and manage the status of your rotisserie fleet, upload recipes and analyze operational data. Allow selected service partners to consult the service dashboard and perform online diagnosis.
