

# Fast and energy saving

TDR 5 Manual

The Turbo Deli Rotisserie is the fastest original rotisserie in the industry. The TDR's cavity is fed with fresh air, cooking a rotisserie chicken as it is meant to be: **crispy and delicious while maintaining an attractive appearance for hours.**

The TDR pushes the air throughout the cavity, resulting in an improved heat transfer on the products. It consumes less electricity during the preparation process. Add to this the improved cooking time and you have the most energy efficient rotisserie and a high output.

The double glass doors create a striking, large display section that maximises your products' visual appeal to customers! It also offers perfect insulation with contact temperatures below 158°F.

## Features TDR 5 Manual

### Top features

- Controls with manual settings
- Set time, temperature and start of the rotisserie
- Efficient heat transfer reduces energy consumption

### Standard characteristics

- 5 Meat fork, V-spit, basket or rack positions
