

Making it all about the food - and your profits

Multi Deck Display 48 - 4 shelves

Self-serve, for packaged hot food

With full focus on the food, the best hot holding conditions in the industry and up to 50% less energy consumption than competitor units, Fri-Jado's Multi Deck Display (MDD) is the ideal solution to boost your profit from packaged grab-and-go products.

The combination of its transparent design and ultra-thin shelves with LED lighting really puts your food in the spotlights, stimulating impulse buying. Combined with conduction heat, patented hot airflow recirculation per shelf keeps your products warm and safe for longer (less waste!), while minimizing energy consumption. This results in substantial cost savings and a lower impact on the environment.

The Multi Temp function allows you to set temperatures individually for each shelf, in order to fine-tune the holding conditions for hot products from different food groups.

More MDD benefits on frijado.com

Ultimate product visibility - transparent design, thin shelves, no distraction.

Keeps food hot from all sides - Fri-Jado's patented Hot Blanket technology.

Food (literally) in the spotlights - LED lighting above each shelf.

Wide range of accessories available.

Features MDD 48 - 4 Self-serve heated merchandiser
