

Scale Inhibitor System | SI-QD-SP

SAFEGUARD YOUR KITCHEN EQUIPMENT WITH EASE

Easily protect expensive equipment and reduce maintenance costs by pairing the SI-XL Scale Inhibitor System with an ultrafiltration system.

The SI-QD-SP is a unique product designed to provide mineral scale prevention and corrosion control by feeding a controlled amount of scale control product into the water stream, resulting in consistent scale prevention and corrosion control for predictable periods of time. Unlike standard scale control feed systems, the specially designed SI-QD-SP cartridge sequesters the scale control product from the main water flow allowing the product to dissolve slowly providing predictable treatment periods.

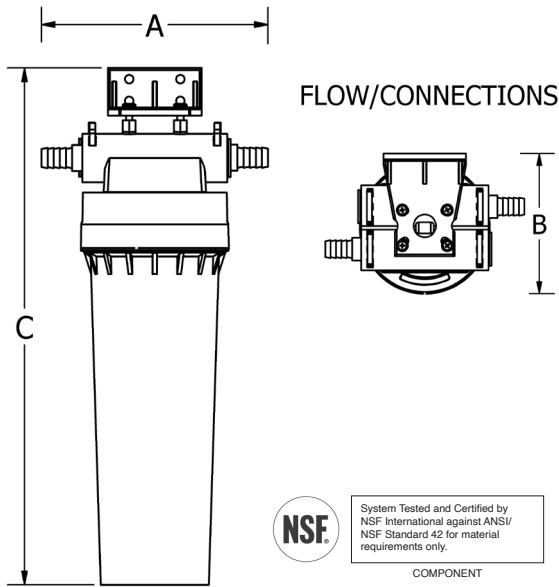

Small Footprint
Ideal for small back rooms

Enhanced Design
Bayonet style quick disconnect cartridge makes filter replacement sanitary, quick and easy

Scale Inhibitor System | SI-QD-SP

Features:

- Bayonet style quick disconnect cartridge makes filter replacement sanitary, quick and easy
- Compact design facilitates system placement and installation
- Mineral scale control for water-fed equipment
- Replacement cartridge #: 7002411
