

/// Serve perfectly toasted muffins and croissants for breakfast menu items with the RTDL Radiant Toaster with Dual Lanes from Antunes.

The Radiant Toaster with Dual Lanes features two toasting lanes for a high toasting capacity while maximizing valuable counterspace. Designed for quality and consistency, the RTDL uses a smart controller that senses product and automatically adjusts toasting time for the perfect caramelized crispiness, every time, for every volume.

Each toasting lane is independently controlled for maximum flexibility while toasting different products at once. The RTDL's front load and front return allows operators to work quickly and efficiently without wasting any time or energy reaching for product. With an integrated holding zone, operators can keep up with demand during peak hours.

FEATURES:

- /// Dual toasting lanes with independent controls for toasting a variety of products, including muffins and croissants.
- /// Smart controller senses product and automatically adjusts toast time.
- /// Independent, adjustable top and bottom heaters.
- /// Programmable touchpad controller.
- /// Removable crumb tray for easy cleaning.
- /// Front load and front return.
- /// Compact footprint.
- /// Integrated landing zone.
