

PF Automatic Backwashing Prefilter

The Automatic Backwashing Prefilter by VIZION™ is designed for high-performance silt, sediment, and turbidity reduction. Its unique media properties allow it to provide superior results at a low cost, making it ideal for nearly every cold-water application.

The Automatic Backwashing Prefilter has 1" NPT inlet and outlet connections. The prefilter also includes a built-in timer for user adjustable automatic backwashing and improved performance. It is intended for cold-water use only.

Features

- Long-lasting media not consumed in the process.
- Simple, periodic backwash keeps media clean and operating efficiently.
- Removes precipitated metals.
- High performance treatment for silt, sediment, and turbidity.
