NEW MODELS!

Introducing...

NEW LINE OF MOBILE REFRIGERATORS AND FREEZERS

Maintain food quality and improve safety and efficiency

50% MORE ENERGY EFFICIENT

Carter-Hoffmann's mobile refrigerators and freezers are now 50% more energy efficient. They comply with the Department of Energy's strict efficiency standard but maintain the performance you've come to expect.

BUILT TO MOVE

Unlike stationary refrigerators and freezers, these cabinets have heavy-duty components to withstand the rigors of transport. The high efficiency refrigeration system provides consistent, even air flow and quick "pull down to operating temperature and quick recovery during times of heavy use.

**DOE
COMPLIANT**

IMPROVE YOUR OPERATION

The ensure higher food quality and safety by providing on-site refrigerated holding for catered events; increase tray make-up efficiency in volume feeding establishments; and provide instant back-up capacity in buffets and cafeterias.

THE ULTIMATE IN REFRIGERATED FOOD TRANSPORT

MOBILE REFRIGERATORS AND FREEZERS

Every mobile refrigerator is equipped with an energy management system to meet the standards of the US Department of Energy. Highly efficient condensate evaporator and fan are engineered to operate with lower energy requirement and all have better insulation than previous models.

BANQUETS AND CATERING
